## OPIS IZDELKA

### Baseus Super Si 1C fast charger USB Type C 25W Power Delivery Quick Charge black (CCSP020101)

A fast and safe charger is an accessory that will be useful to everyone, regardless of what electronic equipment they use on a daily basis. By choosing a Baseus product with a power of up to 25 watts, you gain the ability to efficiently replenish the battery of your phone, tablet and many other devices. The charger is extremely universal - equipped with an EU plug and a popular USB Type C socket. Thanks to this, it will allow you to charge most devices available on the market. You can also be sure that the energy transfer is smooth and without any risk of failure, because it is supervised by numerous built-in protections.

**Set contains:** AR-SET d.o.o. Dobravica 10 A 8310 Šentjernej Davčna št.: SI16935381 Tel: 059 048 227

- 1 x AC charger

**The most important features:**

- Wide Compatibility
- Universal use
- High power
- Handy dimensions
- Supports fast charging protocols
- Built-in chips recognizing the type of loaded equipment
- Device protection while charging

**A universal accessory for everyone**

If you are looking for a universal charger that will be used to charge various devices, such as phones or tablets, then this product will certainly work perfectly. Equipped with an EU plug and a USB Type C socket, it ensures wide compatibility with most popular electronic equipment. It is an accessory that is always worth having with you - at home, at work and on the go.

**Fast charging and high power**

The charger has a power of up to 25 W, which allows it to transfer electricity with maximum efficiency. It has been equipped with systems supporting fast charging protocols, present among others in Apple devices, but not only. You can power your equipment quickly, efficiently and without waste.

**Built-in security**

The presented charger is a modern accessory that ensures that the energy is transferred in the most efficient and safe way. The built-in chip recognizes the type of loaded equipment to select the optimal power parameters. Numerous safeguards protect delicate electronic devices against dangerous overvoltages, overcharging and overheating. So you can connect them to the charger without fear of damage or malfunction.
