OPIS IZDELKA

Joystick PXN-F16

Feel like you're at the controls of a real airplane. The PXN-F16 Joystick offers a realistic vibration system, so it can provide a higher level of immersion. You also get an 8-way Hat Switch and programmable buttons. The device guarantees unparalleled precision and works perfectly with most popular flight games. What's more, it fits fantastically in your hand thanks to its ergonomic design. The joystick is compatible with Windows XP, 7, 8 and 10.

The perfect option for gamers

Microsoft Flight Simulator, or maybe War Thunder? With the PXN-F16 joystick you will take your gaming experience to a new level! The device perfectly replicates the functionality of its real-world counterparts. It is equipped with an 8-way Hat Switch that allows you to quickly change the viewpoint, and it also has a built-in throttle. Programmable buttons are also available, so you can further customize the joystick to suit your habits!

Improved design

Enjoy dreamlike comfort even during prolonged gameplay. The PXN-F16 joystick features an ergonomic design, and the highest quality materials were used in its construction. As a result, it is very pleasant to the touch and fits perfectly in the user's hand. What's more, the non-slip silicone pad ensures that the device will not slide on the surface of your desk. Focus on the gameplay and achieve your best score!

A new level of realism

Take the controls and feel like a professional airplane pilot. The PXN-F16 joystick will give you a greater level of immersion and make you feel like you're in the center of exciting events while sitting at your desk! The device has been equipped with a vibration engine, thanks to which each virtual clash will gain even more realism. Also noteworthy is the Rapid-Fire trigger, which will allow you to effortlessly shower your opponents with a hail of bullets. With PXN you get even more fun from the game!
