## OPIS IZDELKA

### Baseus CATYS-02 USB to USB-C fast charging cable

Baseus CATYS-02 USB to USB-C cable allows you to charge your phone fast. It also allows you to transfer files at speeds up to 480MB/s. Durable and resistant to damage - will serve you perfectly for a long time. In the set you will also find a practical strap, which will make it easier to store the cable and prevent it from tangling.

## It will charge your phone in no time

The product supports up to 66W of power and is compatible with 40W fast charging. This means it can instantly charge your iPhone, allowing you to save time! No more waiting endlessly for your smartphone to be ready to use again - with Baseus, it only takes a few moments.

## You'll be copying your files in no time

This practical cable not only lets you charge quickly - it also lets you transfer files in no time. The transmission speed of up to 480MB/s will certainly meet your expectations. A 1GB movie can be copied in just 24 seconds! With the cable you can charge your phone and transfer data at the same time.

## For the security of your smartphone

With Baseus, you don't have to worry about the safety of your iPhone either. The built-in smart chip will effectively protect it from damage. The cable provides stable voltage while charging. It also protects your phone against overcharging and overheating among other things.

## **Solid, durable construction**

The cable consists of strands of reinforced, tin-plated copper. It is protected by a sheath made of durable ABS plastic. This makes the cable resistant to bending, breaking or tearing. What is more, the place which is extremely susceptible to damage - the connection between the cable and the connector - is additionally protected with a TPE shield. The product will surprise you with its reliable operation.

**ATTENTION**  
Cable is not compatible with iPhone 15 series phones
