Keep cables and small electronics tidy

The organiser lets you store cables, chargers, earphones, USB drives, a computer mouse, and other small accessories in one place. This makes it easier to keep your bag, suitcase, or drawer tidy and to quickly find whatever you need.

Dual-layer design makes sorting simple

The interior is divided into two layers, so different accessories can be stored separately. This makes it easier to arrange cables and electronics and helps you make the most of the organiser's 1.6 l capacity.

Better protection for stored accessories

The water-resistant construction and soft interior help protect the items inside during everyday use. The impact and dust protection is especially valuable when carrying delicate electronic accessories.

Compact dimensions that are perfect for travel

The organizer measures 21 x 6 x 13 cm and weighs 150 g, so it takes up very little space in your luggage. You can use it on business trips, holidays, daily commutes, or simply to store accessories at home and in the office.

Wrist strap and zipper for added convenience

The practical wrist strap makes the organizer easier to carry when it is not inside a larger bag. The zipper provides quick access to the contents and helps keep stored accessories securely inside the closed case during transport.
