OPIS IZDELKA

Hub 12in1 Baseus EliteJoy Gen2 series USB-C to 2xHDMI+ 3xUSB 3.0+ PD+ DP+ SD/TF+ RJ45+Type-C+ 3.5mm (dark gray)

You can easily increase the capabilities of your MacBook with the Baseus brand Hub. The product offers up to 12 additional ports, supports fast charging protocols and enables high-speed data transmission. It stands out for its solid and well-thought-out design, thanks to which it will also serve you as a laptop stand.

Fast USB-C port expansion

The hub's impressive interface solves the problem of lack of space for connecting additional devices to your laptop. The product offers a USB-C port designed for 100 W fast PD charging, 4K HD2, 4K HD1 and DP ports with which you can connect up to 3 additional displays to your laptop. At your disposal are also inputs for TF/SD cards, 3 x USB 3.0, USB-C, so you can easily and quickly transfer data from cards or flash drives to your laptop. There is no lack of a 3.5mm audio headphone port and an RJ45 input for a network cable.

Practical stand function

Thoughtful design makes it an extremely practical device. It will serve you not only as a hub, but also as a laptop stand with an 8° tilt - such an angle will improve your comfort and allow you to rest your wrists. Moreover, such a solution allows you to keep your desk in order and save a lot of space.

Solid construction

The product was made of high-quality materials and has a silicone, non-slip finish, thanks to which it provides solid support for your laptop. It works with Windows, iOS, Windows Vista and Linux and provides wide compatibility. In addition, it is equipped with a number of safety features that counteract voltage, short circuit, etc.
