OPIS IZDELKA

1MORE SonoFlow Headphones

Experience how fantastic your favorite tracks can sound. The SonoFlow headphones are equipped with dynamic 40mm drivers that guarantee crystal clear sound. Built-in microphones allow you to talk comfortably, and Bluetooth 5.0 is responsible for fast connection to your device. They also use innovative QuietMax noise cancellation technology, which reliably eliminates background noise. A dedicated app offers 12 EQ settings, and they have a runtime of up to 70 hours. The foldable and ergonomic design will ensure dreamlike comfort even when listening to music for hours.

Experience your favorite songs anew

SonoFlow headphones will surprise you with excellent sound quality. Thanks to 40-millimeter dynamic drivers with a DLC composite diaphragm, you can enjoy richly detailed and crisp sound and deep, powerful bass. They have also received Hi-Res Audio certification, which confirms that the headphones will provide you with an exceptional musical experience.

Immerse yourself in the sounds

Now nothing can stop you from listening to your favorite tunes. The headphones use 1MORE's patented QuietMax noise cancellation technology, which reliably reduces background noise by up to 40 dB. Listen to music freely whether you're walking in the park or riding on a crowded subway! Want to stay in touch with your surroundings? Take advantage of Transparency mode, which will allow you to listen to your favorite playlist, for example, during an evening running workout.

Wireless and wired

Forget about limitations! The SonoFlow model can work both wirelessly and wired. Innovative Bluetooth 5.0 technology guarantees fast, reliable and stable signal transmission of up to 10 meters. What's more, you can pair the headphones with 2 devices simultaneously! There is also a 3.5mm audio cable at your disposal, so you can easily connect the headphones to your computer, for example.

Up to 70 hours of operation

You no longer have to worry about the headphones discharging when you least expect it. The durable 720 mAh battery provides up to 70 hours with ANC mode off or up to 50 hours with ANC on. The headphones also support fast charging, so after just 5 minutes of charging you can play music for another 5 hours. The USB-C cable you'll find included will make it easy for you to renew your power.

Clear conversations anywhere

Talk on the phone without interruption, even in extremely noisy places. Built-in microphones with AI algorithm combined with noise cancellation technology will accurately record your voice while suppressing background noise. As a result, your interlocutor will easily hear your every word.

Hassle-free operation

You can conveniently operate the headphones with the built-in buttons. Using them, you can, among other things, manage incoming calls, activate the voice assistant, adjust the volume or change songs. There is also a dedicated 1MORE Music app that lets you choose from 12 EQ settings. You can easily find the right EQ setting to make your favorite songs sound even better - whether you listen to rock, classical or electronic music.

Ergonomic design

The SonaFlow headphones were created with comfort in mind. They feature soft protein leather earcups that fit perfectly over your ears without causing uncomfortable pressure. You also don't have to worry about feeling uncomfortable during prolonged use. The adjustable headband will allow you to adjust the headphones to your needs. They are also distinguished by a foldable and extremely lightweight design - they weigh only 250 g, which will have an additional impact on the comfort of use. You'll also find a practical carrying case for easy storage and transportation.

Included
