OPIS IZDELKA

BD-R DL 50GB 6x 5 Pack Jewel Case

The advent of Blu-ray technology has led to the introduction of high capacity storage discs to meet the demand cause by the rapid growth of high definition television (HDTV).

Blu-ray discs get their name from blue laser technology. The shorter wavelength of the laser is the reason it is blue in colour. The blue laser has a wavelength of 405nm compared with the wavelength of 650nm for DVD which utilises red laser technology. The benefit of having a blue laser with a shorter wavelength means it is possible to write smaller data pits and therefore vastly increase the amount of data on the disc.

Blu-ray discs offer 3 to 5 times the storage capacity of a standard recordable DVD disc, enabling the recording, rewriting and playback of high definition video (HD).

For use only in drives or recorders that support 25GB/50GB Blu-ray Discs without cartridge.

This is a disc with 50GB capacity on a single side compliant with Blu-ray Disc Alliance specifications.
Laser Wavelength: 405nm.
Hard Coat protective layer.
Extremely long archival life.
Excellent playback performance.
BD-R is for use in BD writers and recorders.

Non-printable discs can be written on with a CD/DVD marker pen.
Product Number: 43748
Capacity: 50GB
Speed: 6x
Pack Style: 5 Pack Jewel Case

This disc complies with BD-R Specification Version 1.2
